Equity is about making sure that everyone has an equal opportunity to succeed, no matter who they are or where they come from. It's about treating everyone fairly and giving them what they need to be successful. Sometimes this means giving extra help to those who need it, or creating special programs to make sure that everyone has access to the same opportunities. It also recognizes that not everyone starts out with the same advantages, and that it is important to give everyone what they need to succeed.
